

# Farmers For Action

Farmers For Action UK send their full support to European Milk Board in their quest for better European milk prices via their current milk protests throughout Germany, Switzerland, Austria, Holland, Romania and all other main European milk producing countries involved.

We completely understand and support their aims to achieve the cost of production for dairy farmers across Europe of 44c/l, and will do everything we can to support them with their ongoing efforts.

We understand Romania will commence protests next week. Meanwhile FFA will use next week to assess and talk to other farm organisations across these islands on whether UK should be willing to participate thereafter.
